

YAC-C313

3-Chloropropyltrimethoxysilane

CAS No. 2530-87-2

Specifications:

Tests	Specification
Appearance	Colorless transparent liquid
Assay	≥99.0%
Color (Pt-Co)	≤20
pH	5.0~7.0
Chloride ion	≤30ppm

Package: 200Kg/Drum or 1000Kg/IBC

Application:

- As a rubber processing auxiliary, it is used to couple inorganic fillers in various halogenated rubbers to improve various physical and mechanical properties. It can be used to synthesize organosilicon compounds containing quaternary ammonium cations, serving as mildew-proof and deodorizing finishing agents, with special antibacterial, deodorizing, antistatic, and surfactant properties. In addition, it is also a good intermediate for silane coupling agents.

Storage: Keep container tightly closed in a dry and well-ventilated place. Keep away from open flames, hot surfaces and sources of ignition.

Recommend Shelf Life: 12 months.
